## a step by step guide

If you can draw any of these shapes then you can do these little Christmas drawings..!

### Baubles

Baubles can be any shape or size, and you can change up the patterns and colours once you get the hang of drawing them. You can add also words and names onto them.

Start with a basic pencil circle

Add a little attachment piece at the top - draw a rectangle and a half circle

Add a string with a little bow

You can also change the shape of your baubles

### Baubles as frames

Baubles work really well as a way of framing individual letters such as the ones used to spell out MERRY. Then you can write out Christmas in a fake calligraphy or brush lettering style underneath.

This is extremely effective on the front of a Christmas card or gift bag.

## Pile of Presents

An easy little drawing that can be coloured in for an extra fun look - perfect for adding to tags

Start with some squares and rectangles

Add in two lines for a ribbon, and two 'ears' for a bow

Add in some patterns and a surface for the gifts to sit on

## Santa Claus

Start with an oval slightly at an angle and add a pencil rectangle for the base of the hat
